

Keeping Radon Out of Your Home

A Step-by-Step Guide on How to Build Radon-Resistant Homes

- This two-hour interactive workshop will explain what radon is, how it enters a home and what you can do to help prevent excessive exposure and reduce the risk of lung cancer related deaths in Idaho.
- The class will cover mitigation strategies, what products are needed, where to find them and how to install them to ensure that your home is more comfortable, healthy and code compliant.
- Minor changes during new construction can save hundreds to thousands of dollars off the cost of installing mitigation systems after the home is completed.

Free Training for Homeowners, Contractors and Remodelers

**St. Luke's Elmore (Business Office)
Soldier Conference Room
895 N. 6th E., Mountain Home**
